Bonner Primary

Year 2 SLEEPOVER

Frequently Asked Questions

1. Will boys and girls sleep separately?
Yes. Boys and girls will be in separate sections of the hall. Members of staff will also be present at all times to supervise and support the children.

2. Can children choose who they sleep next to?
Of course! Each child will have the opportunity to choose two friends they would like to be near. Staff will then organise sleeping arrangements so that everyone is close to their friends.

3. Will there be both male and female staff present?
Yes. There will be both male and female staff members supervising throughout the evening and overnight.

4. What happens in case of an emergency?
All teachers attending the sleepover are first aid trained, and a clear risk assessment is in place. If staff need to contact you for any reason, we will call you immediately using the contact details provided.

5. What if my child has allergies or needs medication?
Please ensure any allergies or medical needs are clearly written on the medical forms that have been sent home. Teachers will keep these forms throughout the sleepover and will administer any medication according to the dosage and instructions you have provided.

6. When should we hand in medication?
Please drop off all medication at the main office on the morning of Friday 8th May. Staff will collect and organise everything in preparation for the night. All medication handed in must be included in the medical form.

7. Can my child attend for the evening only and go home before bedtime?
We strongly encourage all children to stay overnight as it's an important part of the learning and social experience. However, if your child would prefer to be collected, please let us know in advance so we can make suitable arrangements.

8. Where can I buy a sleeping bag?
Sleeping bags can be purchased quite easily from most supermarkets (e.g. Tesco, Asda), outdoor or camping stores (e.g. Decathlon), or online retailers such as Amazon or Argos. A simple, lightweight sleeping bag suitable for indoor use is absolutely fine.
